

Helping Children with Autism Learn Everyday Skills and Manage Their Behaviour

This two hour workshop will provide a brief introduction to Applied Behaviour Analysis (ABA). This overview will include: What is ABA? Who will benefit from ABA techniques? Why ABA techniques benefit individuals with Autism Spectrum Disorder.

Purpose: To introduce Early Childhood Educators to specific ABA based teaching techniques for efficient skill development and approaches to decrease challenging behaviours.

To provide the Early Childhood Educators with information that will support them to engage in conversation with families who are waiting for/receiving ABA service through the Four Counties ABA Program.

Place: Five Counties Children's Centre, 872 Dutton Road

Date: Wednesday, February 15th

Time: 6:30 to 8:30 p.m.

No cost, registration required

Presenter: Angela Turner is a Preschool Resource Teacher at Five Counties Children's Centre. She has years of experience working with children who have Autism Spectrum Disorder and works as an Autism Resource Consultant for Geneva Centre for Autism. She has been trained in the use of ABA techniques and has successfully used these techniques with children on her caseload.
